How it works

A 7K lull lift is needed at the time of installation for the following units,

- Wider than 30'
- Taller than 14'
- RV Covers (Double Leg, Double Base Rail)
- Any units with 14'x14' garage doors
- Risk Category II Buildings
- Any roof pitch greater than 3/12 with a leg height of 9' and taller

Lift Rental Policy and Terms

Yes, I understand the Lift Rental needs to be on site before 7am on the day of install. *

I accept responsibility for rescheduling, regardless of the reason (weather, installation crew delays, or other unforeseen circumstances). I understand the lift must be on-site for as long as the crew needs it. Normally, I will be prepared to have the lift on-site for the entire week, unless the building requires the lift for a longer period. *

Custom Built Structures Inc, reserves the right to charge \$1,000 or more per day, for loss of time due to lift not being available. *

Custom Built Structures, Inc. will not be held responsible for any cracking or damage to the concrete or installation surface. This request is fully understood by the purchaser named above, who agrees to hold Custom Built Structures, Inc. harmless and free from any legal claims or liabilities. *
